Add your code below following the instructions given in the course

Data Science Tools and Ecosystem

In this notebook, Data Science Tools and Ecosystem are summarized.

Objectives:

- List popular languages for Data Science
- List commonly used libraries used by Data Scientists
- Perform arithmetic expressions in Python language
- Complete this Python notebook
- Upload or publish the file in your Github repository, and share to others

Some of the popular languages that Data Scientists use are:

- Python
- SQL
- R

Some of the commonly used libraries used by Data Scientists include:

- Scikit
- Caret
- Pandas

Data Science Tools
Apache Spark
Anaconda Jupyterlab
Visual Studio Code

Below are a few examples of evaluating arithmetic expressions in Python

```
In [4]:  # This a simple arithmetic expression to mutiply then add integers
         (3*4) + 5
```

```
Out[4]:  17
```

```
In [5]:  # This will convert 200 minutes to hours by diving by 60
         200/60
```

```
Out[5]:  3.3333333333333335
```
